McKinley-Darragh Tintic Mining

Boston, Feb. 19.—New York wires: In view of the fact that the mines of the Butte Coalition company are producing no copper and no revenue is being derived

therefrom, no action was taken on the quarterly dividend at Tuesday's meeting of the directors. A quarterly dividend of 15 cents a share was declared three months ago. In the preceding quarter a quarterly dividend of 50 cents as the control of th

nd of 50 cents a share was de-

ly dividend of 50 cents a share was de-clared. After the meeting it was an-nounced the development work at the mines was being pushed forward rapidly as possible. Development work which has been going on has encountered rich dis-coveries. It is stated that the mine was never in better shape and is ready for immediate resumption as soon as word to start is given. The surplus of the com-pany is said to be in the neighborhood of \$4,000,000, but was not deemed advis-able to continue the dividends, in face of the fact that the mine is not in oper-ation.

Boston News Bureau says: Proceeds of

new stamp mill.

Houghton, Mich., Feb. 19.—Directors of the Lake Copper company have determined to issue 10,000 shares at \$6 per share. The stock is offered to present shareholders in the ratio of 1 share for every 7 now held. The stock must be taken by March 2. There is little question but that present shareholders will take the stock.

Boston, Feb. 19.—One of five leading copper interests in the United States says:

"It should be recognized that a permanent improvement in the copper market in the United States has got to come about through the financing of new con-

in the United States has got to come about through the financing of new construction enterprises. At the present time money is usually obtainable, but only on good collateral. It is not easy in regard to financing new enterprises."

Another member of the same firm says: "I figure that consumption of copper in the United States is less than 50 per cent of normal at the present time, but Europe.

of normal at the present time, but Europe apparently has an insatiable demand for cheap copper, and on the recent decline to 13 cents, both England and Germany have

een big buyers.
"My advices from Germany are that

there is just as much copper going into consumption there as a year ago, when the price was higher. The foreign consumers strained themselves and cleaned out stocks to about the same degree that

American consumers are now cleaned out. The enormous shipments of copper to Germany the past few months have been dis-

tributed among consumers there in the same manner that copper is ordinarily distributed here."

RETURNS FROM THE EAST

Manager Ernest Bamberger of the

Daly-West, Ontario and other Park

City propositions, returned from an eastern trip Tuesday night, after hav-ing stopped off in Denver for the an-nual meeting of the Daly-West com-

pany Monday. Mr. Bamberger states

hat the east is still suffering from the

ffects of "the late unpleasantness,"

and the return to normal conditions is

lower than it was at first anticipated

Asked if the Ely Witch proposition had received attention during his absence, he said that it had not; that

there was nothing new to report con-

cerning the company or its affairs at

Mr. Bamberger was advised yester-day that the water in No. 3 shaft at

usual heavy flow was coming through the drill holes from the side drift on the 1,500-foot, or drain tunnel level.

The sixth hole has not yet been com-

pleted, but drainage is progressing at a most satisfactory rate.

IN PRICE OF COPPER

New York, Feb. 19 .- At the met-

al exchange today a further re-

was made in all grades of copper of in both the bid and asked prices, making lake 121/4 at 121/2c; electro-

1ytic 121/8 at 12%c, and easting at

Mines and Mining Stocks

KICH MINERAL

According to G. H. Wheeler, a mining man of wide experience, who has been doing considerable prospecting in South Fork canyon, about nineteen miles in a northeasterly direction from Ogden and not far from Huntsville, states that the region is full of mineral and expresses the opinion that a genuine, merited boom will take place there when conditions become known.

"There has been very little prospecting done in that country by men who understand the business," writes Mr. Wheeler, "but holes have been dug all over the country by farmers and others who little appreciate what the showings indicate and who have rarely had assays made to determine just what they had found. I know of many places where ores carrying fine values in silver, gold and copper have been opened up and later abandoned and I would be willing to show any bona fide prospectors or mining men who mean business where the mineral is located. "In addition to the minerals named

I know of the existence of great ledges of manganese, with others carrying plumbago, graphite and even platinum Some of these ledges can be traced for miles and the only reason that they have not been mined is that the people who have done the prospecting, up to date, have been ignorant of mineral formations and the real worth of the deposits. In the ledge carrying the manganese, which is one of the most prominent in the district, there is a strong belt of quartz that assays about \$35 in gold and from 9 to 16 ounces sil-

"Regarding the copper showing, might say there are unlimited quantities of ore carrying that metal. Some three or four years ago when a power company was digging for bed-rock in South Fork canyon with a view of building a big power dam and reser-voir, a fourteen-foot shaft was put down at once place that partially filled with water. After quitting work on Saturday night the workmen left their tools in the hole until Monday morning On returning they found about two feet of water in the hole, and their picks, shovels, etc., all coated over with cop-I have thrown tin cans into that Wabash hole and had them completely coppercoated in three to five days. *The ledge from which this copper solution comes

has not yet been located. "The ore in this country has all been found in the contacts between dolomite lime and porphyry, and I have no doubt the usual cross-fissures will be found here as plentifully as they usually are in the run of mineral-bearing sections. I believe the day is coming when the South Fork canyon country will rank as about the biggest mineral-producing section in Utah, great as its best known camps are today.'

ANOTHER OPERATOR FOR VIRGIN OIL FIELDS

E. H. Crabtree, a well-known business and mining man of Tonopah, Nevada, is the latest convert to the possibilities of the Virgin river oil fields. He leaves here for the east today and during his few weeks' absence he will purchase a complete drilling outfit and in the spring will begin development of the 800 acres of ground he acquired during his trip into the field.

"After going over the whole country for a couple of weeks," said Mr. Crabtree, when seen yesterday, "I came to the conclusion that the field is one of great merit and large extent. I have secured what appears to me to be a first-class location, about eight miles south and a little east of Virgin City, and I shall begin to develop it just as soon in the spring as I can shape up matters and get to work. I shall buy drilling machinery during the few weeks eastern trip I am about to weeks' eastern trip I am about to make and I have no doubt that the outfit will be here by the time the roads are in decent condition for heavy hauling.

Mr. Crabtree was in conference with H. H. (Bullfrog) Clark during the afternoon. They are old friends and the visitor was getting informed on many matters connected with the field, the market for drilling machinery, etc., and he will leave here today a wellposted booster for a region that is already making good.

GREAT MANGANESE LEDGE

Unchanged Prices.

There was no particular change in conditions of the stock market yesterday. Trading was draggy and the disposition was to let things go as they looked. There was some semblance of real business in a few of the Tintic stocks, but on the whole it was plainly a professional traders' game. It is now believed that, even though there is nothing doing in the way of production at the mines for months to come, prices will not go much under what they are today. Every possible unfavorable contingency has evidently been discounted and things will drag monotonously along just as they are now doing until a change in general conditions is effected.

ALSO COPPER, GOLD, SILVER AND
OTHER METALS.

are now doing unit a change in general conditions is effected.
During the two regular and open board calls a total of 36,635 shares of stock, with a selling value of \$18,809.25, changed hands. Following is, the list of final quotations and record of sales made during the day:

COPPER STOCKS IN LAST WEEK'S BOOM AT RAWHIDE CAMP **BOSTON AND NEW YORK**

Following is the daily market comment of Paine, Weber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald: There is no such thing as retrogres sion in Rawhide, the world-beater. The record is one of constant progress, and the last week has been the banner one in the history of the five-months-old camp. It has witnessed the arrival in camp of the first power hoist, which will permit deep mining, says the Raw-

Boston, Feb. 19.—After a very dull day, stocks had a fair rally at the close. The Gould stocks were hammered all day and caused the whole list to appear weak, whereas they held well, all things considered. We do not believe in selling short here, but think it is still a time for caution, and we shall have a traders' market, with rallies when the short interest becomes too large. hide News. hide News.

It has heard the announcement that four other power hoists are being rushed to Grutt and Balloon hills. It has heard that on no less than five great properties three full shifts of miners are to be employed, their employment being the foundation of a permanent payroll, which will spell prosperity for the entire camp.

the entire camp. It has witnessed the establishment of telegraph and telephone communication with the outside world. Rawhide is now in telegraphic and telephonic touch with Reno and San Francisco, and the hurdle of slow communication, at which every camp balks, has been

cleared. It has been a week of many large and important mining deals of every description. It has been a week of new records in banking affairs. It has been a typical Rawhide week, the biggest the camp has known; but typical because in its achievements it reflects the unwavering progress of the camp.

Mining Notes.

The Yankee Consolidated and other companies concerned will meet today to ratify the proposed consolidation of the Mountain View and Lake View with the

Keith Clark, son of W. H. Clark, of the Nevada Hills company, who is attending the Pennsylvania Military academy, 24½ was stricken with appendicitis a few days ago and was to have been operated upon yesterday. His mother left for his bedside Tuesday and his father left yesterday.

Five cars of ore from Utah mines and one from Idaho were released from the Taylor & Brunton sam,ler yesterday. 9-16 Things are evidently running pretty 2½ smooth at the Wheeler Gold company's 9-16 Nevada properties these days. A gold 35% brick was shipped in from there early in 1½ the week and another is promised by the 11/4 the week and another is promised by the week and another is promised by the send of the month. February's production is likely to run considerably over \$3,000, with better things ahead.
